Victor Reinz®

# Reinzosil® RTV Silicone

## Sealing Confidence

REINZOSIL®, a highly elastic universal sealing compound from Victor Reinz®, has been the RTV sealant of choice in Europe for many years. Its durability, flexibility, and versatility has also made it a favorite among import car repair specialists. Now, Victor Reinz® is bringing this exceptional and in-demand product to the entire North American aftermarket.

# Victor Reinz® **Reinzosil® RTV Silicone**

The leader in engine sealing technology adds Reinzosil® to its product lineup.

Victor Reinz No.	Product	Package Unit
70-31414-10	70 ml Tube	25 tubes in counter display

## Notes About Using RTV Sealers

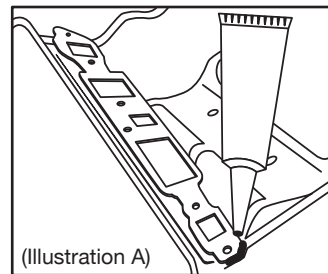

REINZOSIL®, and all RTV sealants, should always be used with care and according to manufacturer recommendations.

## REINZOSIL® Features

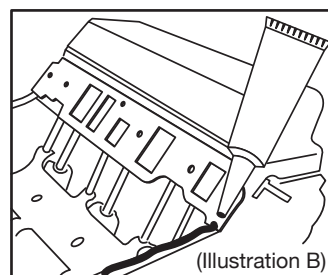

- Resistant to temperatures from -50°C to +250°C (briefly up to 300°C)
- Excellent resistance to fluids including mineral oils and numerous synthetic oils, lubricants, petrol, diesel oil, greases, hot and cold water, detergents, sunlight, ozone, and sea water
- Fast, acid-free curing
- Odorless - will not harm oxygen sensors
- Non-hazardous substance (tube)
- Sealing gap > 0.15 mm

## REINZOSIL® Applications

- For use at gasket intersections and on components that were originally sealed with RTV by the manufacturer (such as intake manifolds, valve covers, oil pans, etc.).

Apply a small dab of RTV Silicone Sealer at the junction of intake manifold side rail gaskets and rubber end seals. (Illustration A)

If the gasket set does not include pre-formed end seals, apply a continuous 3/16" bead of RTV silicone across both end rails of the block. (Illustration B)
